DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 21, 2008 has been entered.

Claim Objections

Claim 22 is objected to because of the following informalities: It appears that "said vertebral bone" in lines 4-5 appears to be out of place making the claim unclear. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 22, 28-32 and 79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scholten et al (U.S. Patent No. 4,969,888) in view of Kuslich (U.S. Patent No. 5,549,679)

Application/Control Number: 10/804,761 Page 3

Art Unit: 3775

Scholten et al. discloses the creation of a cavity within the vertebral bone through an access aperture (Fig. 18), and the insertion of a container (76) within the cavity created within the vertebral bone, said container having a fill passage (77) coupled to said container, deploying said container within the cavity created within the vertebral bone, injection a bone filler material into said container through said fill passage. Scholten discloses the claimed invention except for a second injection of a material different from said bone filler material into said container through said fill passage. Kuslich discloses the use of different implantation materials. Column 9,lines 55-60 describe the use of bone chips implanted within the bag. Column 7, lines 15-17 disclose additional different implantation materials, e.g. hydroxyapatite. Also described with the filler material are fluids, which are considered to be the second bone filler. Inherently, the bone chips have a different viscosity and chemical makeup than the hydroxyapatite. The filler is introduced to the cancellous bone as in-growth of bone occurs. It would have been obvious to one skilled in the art at the time the invention was made to have made the invention of Scholten et al. with a secondary filler material in view of Kuslich, in order to have an implant that has better fusion with the natural bone.

Allowable Subject Matter

Claims 33 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 22 and 28-32 and 79 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL J. ARAJ whose telephone number is (571)272-5963. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
